Training Description

Learn to facilitate mindful meditations and other mindfulness activities with horses to support your clients with greater balance, better ways to manage stress, and supporting self-care. The heart-centered interactions in this program can be a foundation to increase their compassion, empathy, and gratitude.

Mindfulness is simply maintaining focus in the present moment while being aware of what you're sensing and feeling, without judgment. Horses are the best mindfulness teachers because they primarily live in the present moment, and typically in a coherent state. Explore coherence, the benefits of being in this state, and how horses support us in shifting into it (all based on coherence research). Best of all, experience for yourself this regulated coherence state and its effects.

These experiences with horses are active and very different than typical meditation and mindfulness experiences. Many that have struggled with meditating, find ease with meditating with horses. Clients enjoy how the horses choose how to interact with them and the deeper connections that unfold, and often attend again.

This is a beautiful personal wellness experience with horses, whether you choose to facilitate these experiences after this training. If you do, everything is provided to host programs right after the training, including step-by-step processes, activity descriptions, meditation scripts, forms, tools, templates and sample agendas to facilitate programs right after the training.

After the training, you'll have access to our free online community (private Facebook group) to connect with others that have attended our trainings to collaborate about EAL tools, techniques, resources, facilitation opportunities, and in many other ways. Also, you may always contact EAL Academy for support with your questions.

Prerequisites:

- Experience with safely handling horses on the ground, no riding or driving experience is needed.
- Prior certification is not required, although EAL Academy's 4-day Certification training supports facilitating all types of EAL programs and includes additional activities to use during mindfulness EAL programs along with tools and templates for leading your EAL programs – marketing, pricing, liability, program planning, etc. These topics are not covered in this training.
- No experience with mindfulness or meditation is needed.
